AizaMD

Automated Clinical Note-Taking. Custom Specialty Workflows.

AizaMD™ uses ambient intelligence to instantly transcribe conversations into accurate medical notes in real time.

AI-Powered Intelligent Care, Saving Lives!

“If anyone saved a life, it would be as if they saved the life of all mankind”

savelife.ai

Problem

The Documentation Burden

Working hours on documentation

50%

Report paperwork overload

67%

Burned out from administrative burden

40%

Excess time is wasted on documentation, prolonging appointment times, and contributing to clinician burnout. **This, in turn, negatively affects patient care.**

Industry estimates from internal materials.

AizaMD

Core Features

AizaMD

savelife.ai

AizaMD™ : Ambient Mode

Record & Generate

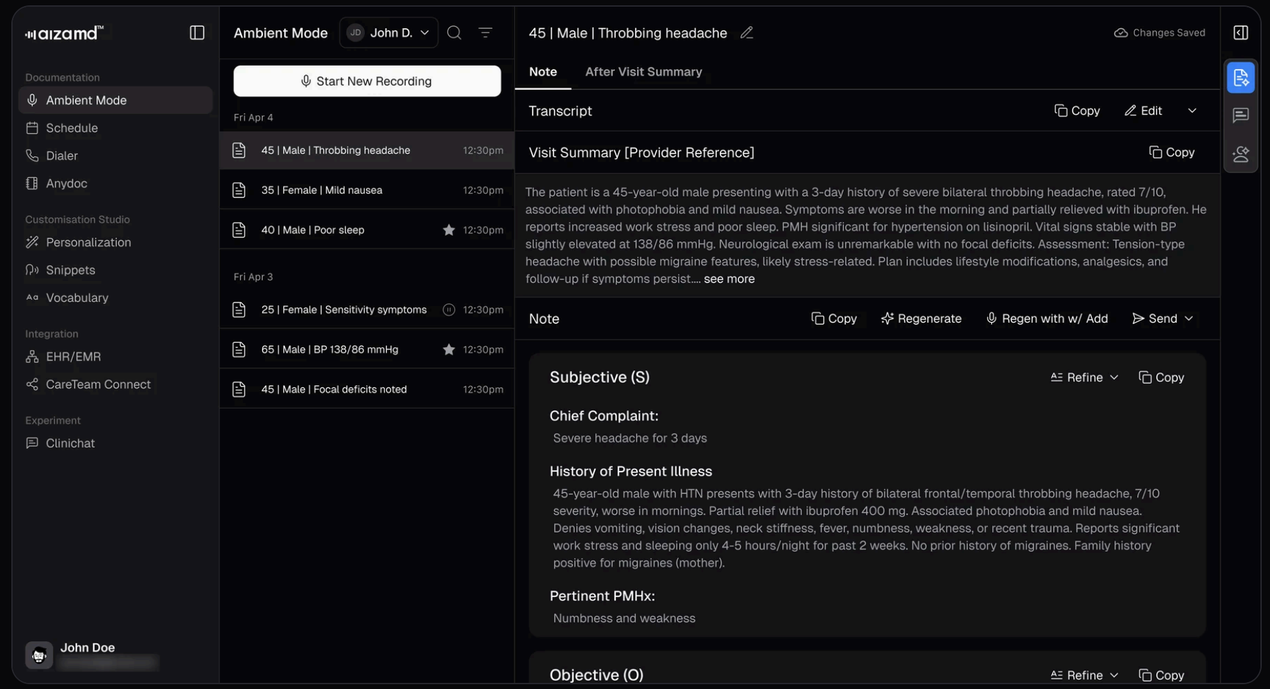

Instantly record clinical conversations with patients by dictation during consultations to generate:

Audio & Transcript

SOAP Notes

After visit Summaries

Ensure better quality care and lesser screentime.

AizaMD

savelife.ai

AizaMD™ : CliniEnhance

Clinical & Financial Impact Smart Suggestions

Flags Missing/Unclear Details

Analyzes transcripts and reports for under-documented areas that affect compliance or diagnostic quality.

AI-Guided Suggestions

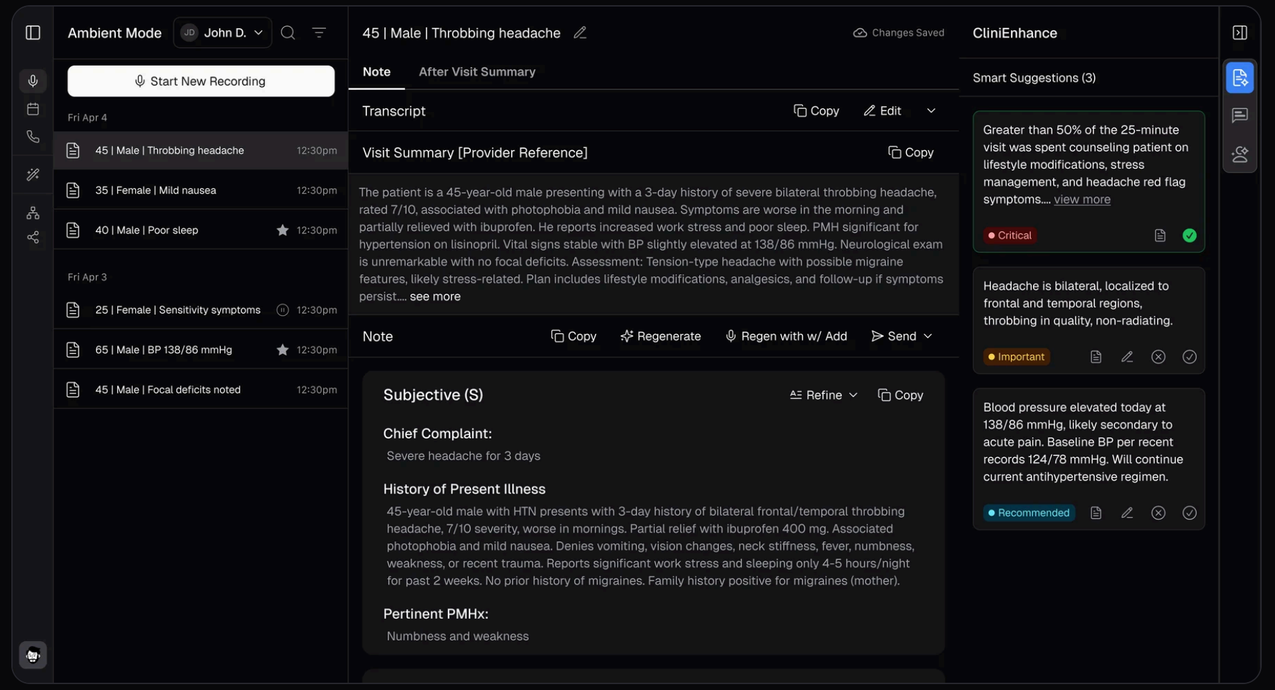

Provides improvements based on clinical standards.

Real-Time Integration

Accepted edits instantly update transcripts.

Billing-Critical Gaps

Detects documentation gaps impacting reimbursement or causing denials.

AizaMD

savelife.ai

AizaMD™ : Dialer

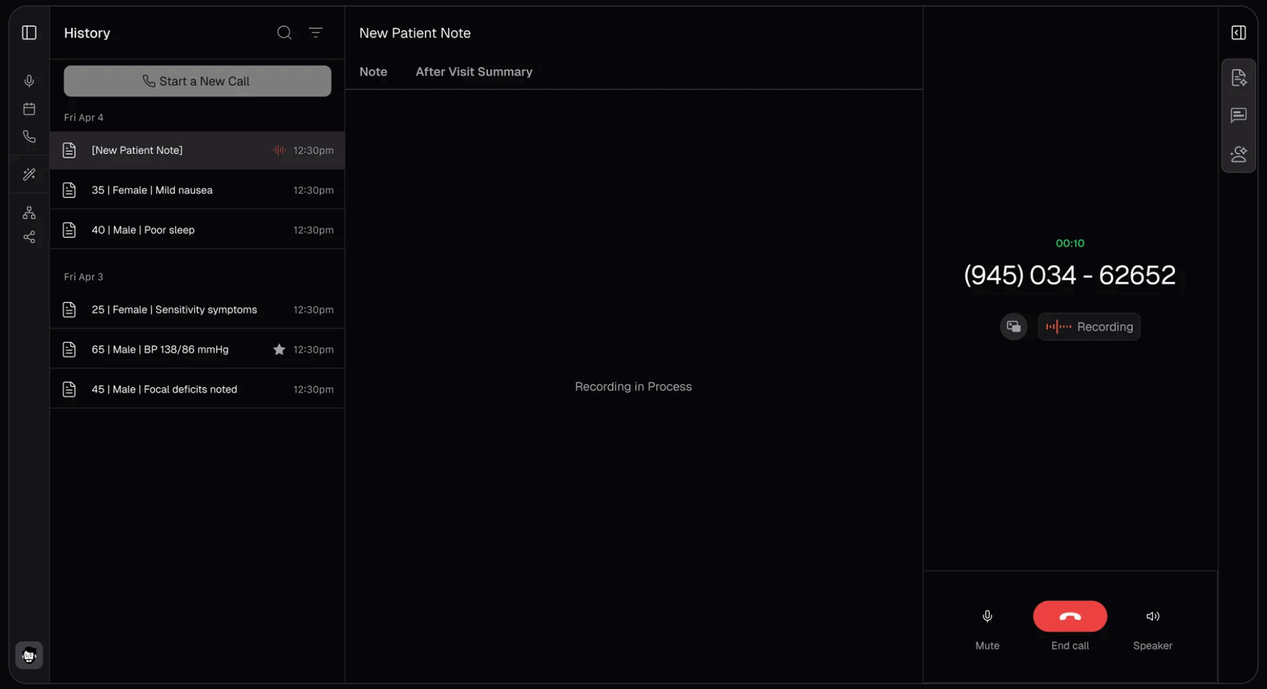

Phone Encounters

Streamline patient updates with calls that discuss results and care plans, automatically generating clinical notes.

Seamless Calls

Automated Notes

Effortless Integration

AizaMD (Coming Soon)

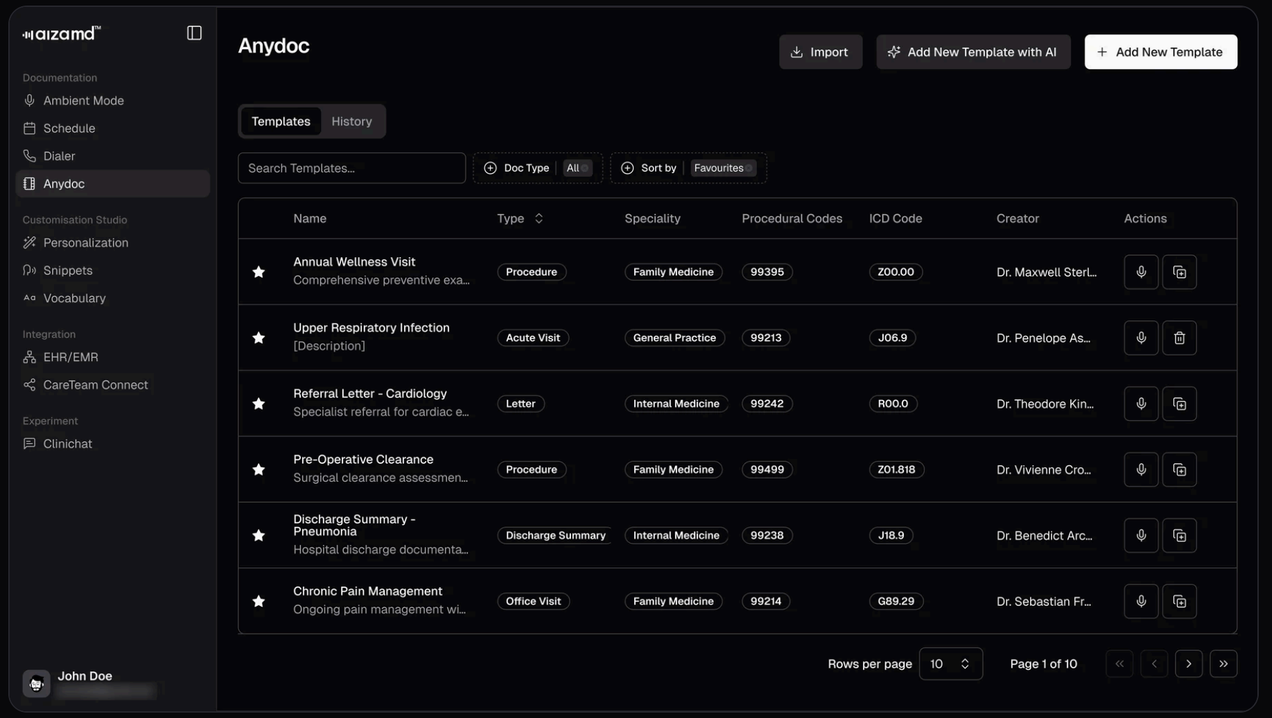

savelife.ai

AizaMD™ : Anydoc

Any Documentation

Generate any type of documentation including:

- EEG Reports
- Discharge Summary
- Procedures
- Letters
- Miscellaneous

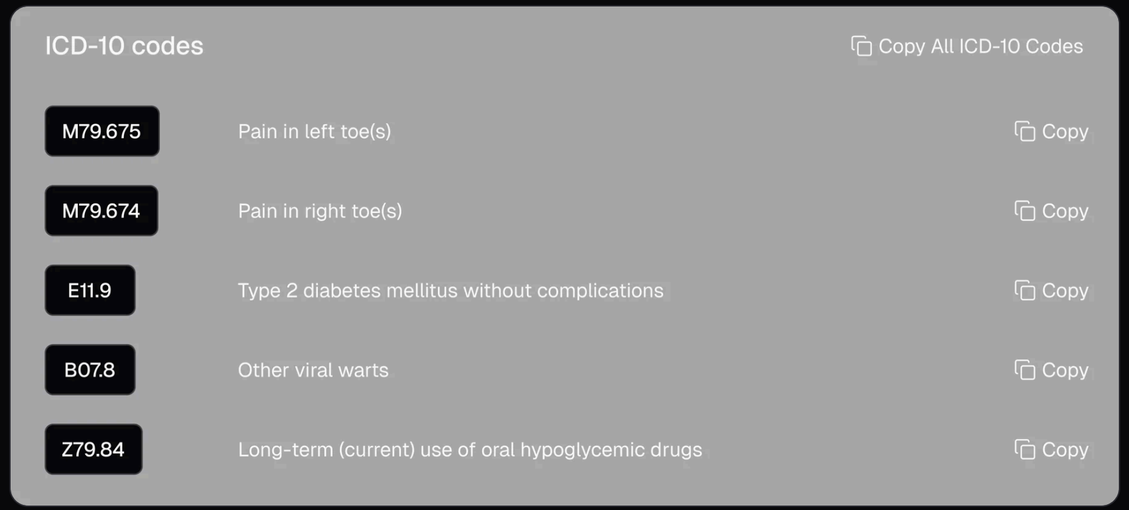

AizaMD

savelife.ai

AizaMD™ : Medical & Billing Codes

Auto Generated Codes

Eliminate the burden of manual coding so clinical documentation is complete, compliant, and ready for billing. With built-in medical logic, our system identifies both:

ICD-10 Codes

Procedural Codes

savelife.ai

AizaMD™ : Customization Studio

Personalization

Personalize SOAP notes to match unique clinical styles and needs.

Objective

Subjective

Plan

Assessment

AizaMD

savelife.ai

AizaMD™ : Snippets

Intelligent Trigger Workflows

Dot phrase like functionality to add custom text in clinical notes.

Examples

X-Ray Report

Macro Type: Add-on Section

Behavior: Automatically appends a detailed X-ray report at the end of your note using trigger phrase

Insert Template X-ray Report

Available for: Podiatry, Internal Medicine, Family Medicine, Pediatrics, Orthopedic Surgery

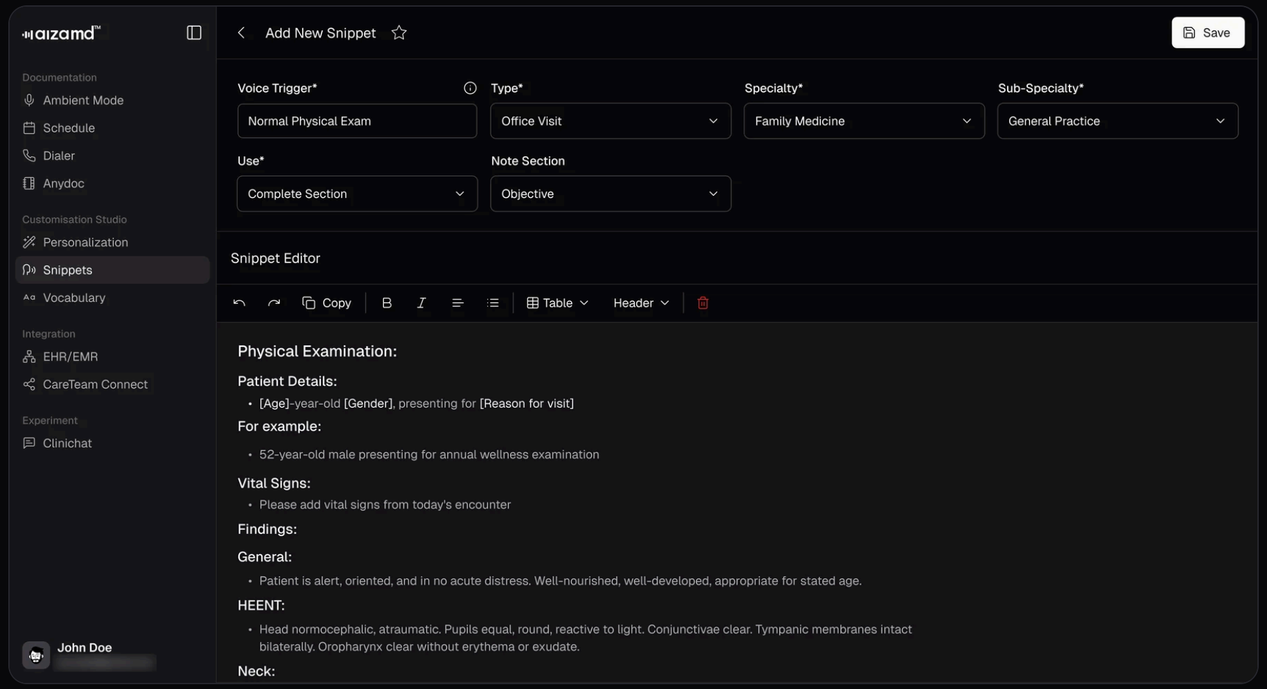

Wound Care

Macro Type: Objective Section Replacer

Behavior: Replaces the Objective section with a detailed wound care template, filled automatically from dictation

Insert Template Wound Care 1

Available for: Podiatry → *Wound Care Podiatry* subspecialty

AizaMD

savelife.ai

AizaMD™ : EHR/EMR Integration

Seamless Integration

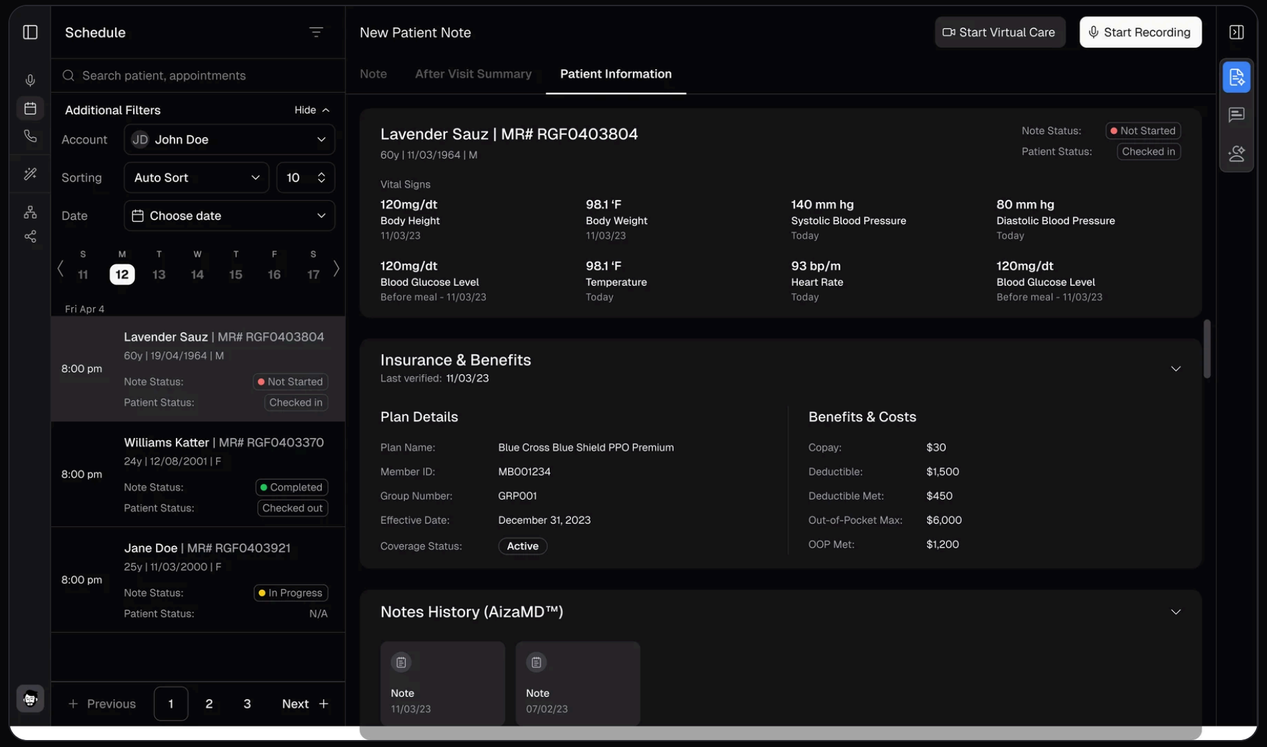

Direct EHR integration for instant record sync.

Two-Way Sync

View Schedule: Access patient appointments directly from the EHR.

Fetches physician schedules automatically

Pushes structured results into the EHR

savelife.ai

AizaMD™ : CareTeam Connect

Multi-User Access: Shared Documentation and Scheduling

Empower your healthcare team with Careteam Connect to enable secure, real-time collaboration across clinical documents.

Share mutual access with trusted team members (e.g., assistants, practitioners) to co-manage documents effortlessly.

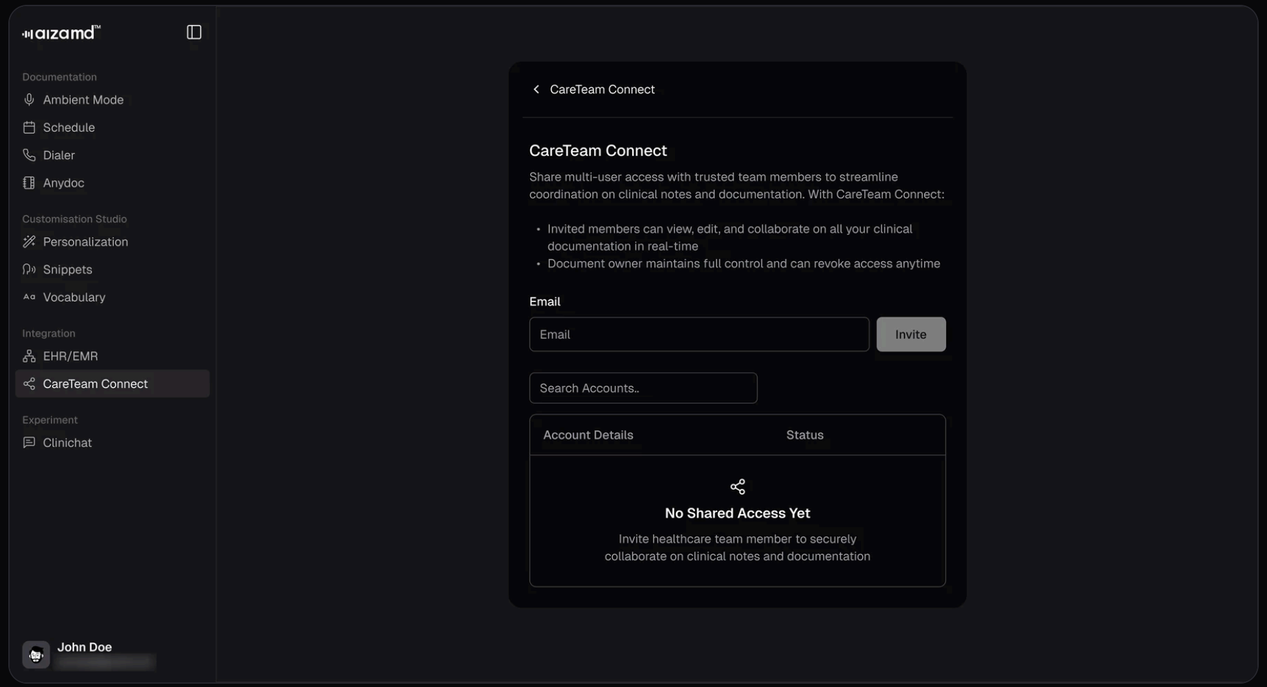

Access Management

Collaborative Editing:

Users can view and edit documents, enabling team-based decision-making.

Access Control:

Only document owners remain in control, having revoking authority.

AizaMD

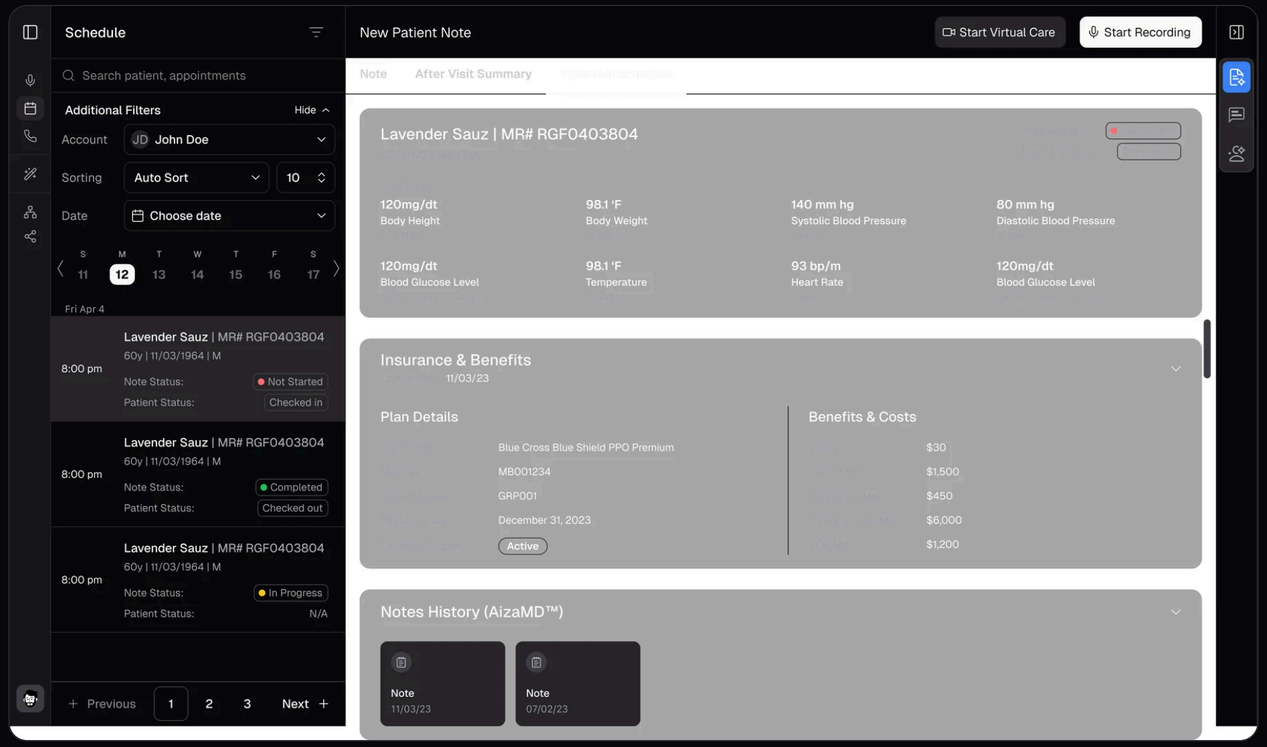

savelife.ai

AizaMD™ : AI - Assisted Virtual Care

Every virtual encounter is automatically converted into a structured SOAP note.

Patient Information Including:

- Insurance & Benefits
- Plan Details
- Benefits & Costs
- Notes History

savelife.ai

AizaMD™ : CliniChat

Intelligent Conversations

AI-Powered chat delivering smart, contextual responses for enhanced clinical care. (for experimental use only)

Upload scans and share information

Ask detailed follow up questions & discuss findings directly with the AI

Get context-aware responses tailored to your clinical queries

CliniChat does not provide diagnosis, treatment recommendations, or clinical decisions.

savelife.ai

AizaMD™ : Custom Workflows

Customized flows to improve care delivery time and reduce care management costs for partners.

Personal Injury

Custom workflows designed for pain specialists' needs.

Acute Stroke Care

Customized workflows tailored
for acute neurologists' needs.

AizaMD

AizaMD™ : Schedule

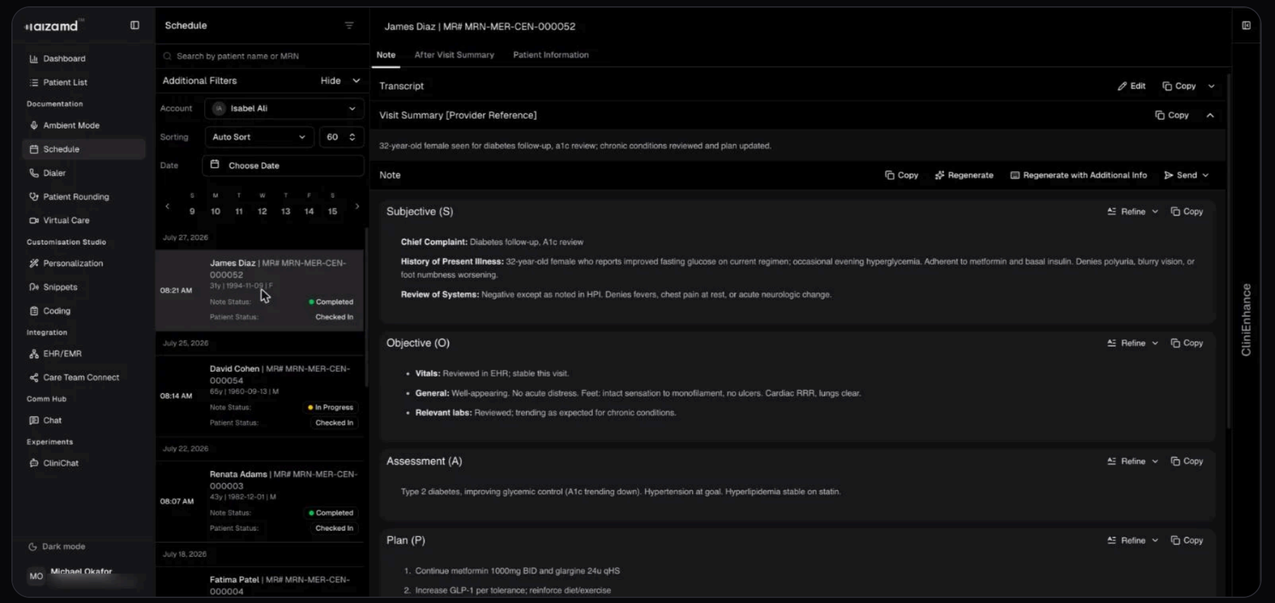

Today's Patients

Straight from your EHR, ready to document.

Synced Appointments

Note Status

Open and Document

AizaMD

AizaMD™ : Coding

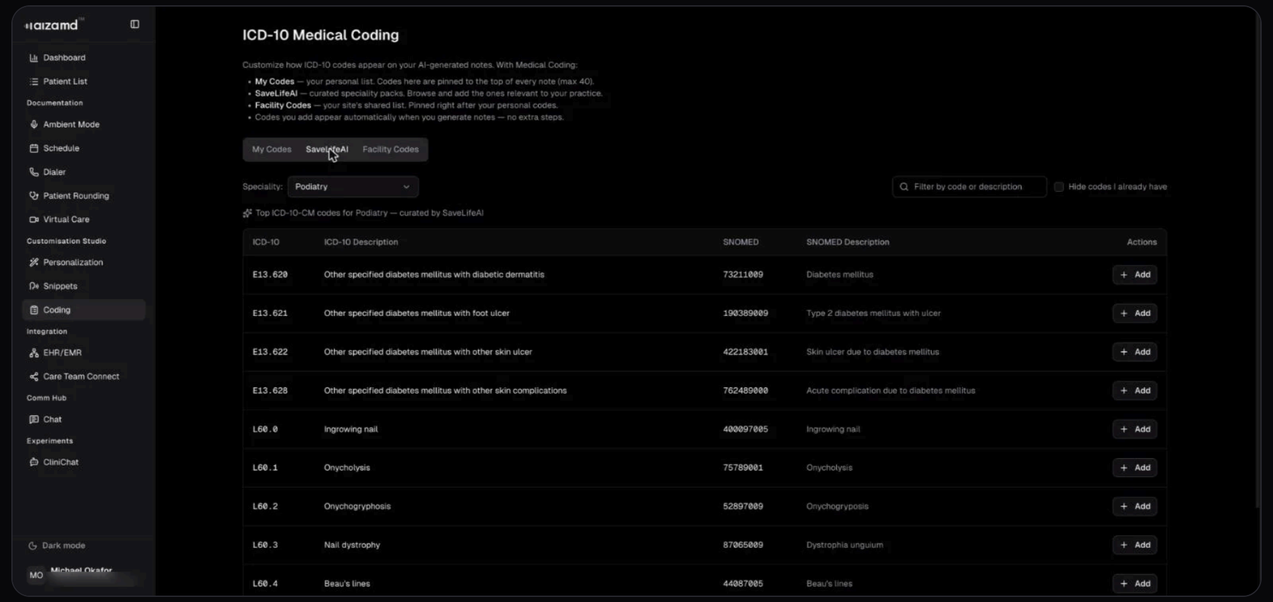

Pinned to Every Note

The code sets your speciality uses.

AizaMD

How it Works

savelife.ai

AizaMD™ : How it Works

Transform Clinical Encounters into Notes Effortlessly!

Step 1: Personalize: Choose Your Specialty & Sub-Specialty

↓

Step 2: Transcribe: Record Provider-Patient Encounter

↓

Step 3: Create: Generate SOAP Notes

↓

Step 4: Integrate: Seamless Integration with EHR

savelife.ai

AizaMD™ : Tailors to Specific Needs

One Size Doesn't Fit All!

Step 1

Choose your Speciality & Sub-Speciality

This ensures that generated notes align with the clinical focus of the provider.

Step 2

Configure your Primary Care Settings

Click on the setting which best suits your clinical needs.

Step 3

Choose Note Formatting Options

Choose the Format That Best Fits Your Workflow

Minimize redundant edits by using pre-configured, editable objective sections.

Modify and refine content as needed for consistent and high-quality notes.

Ensure specialty-aligned notes that reflect the provider's practice needs.

AizaMD

Value

AizaMD

savelife.ai

AizaMD™ : Key Benefits

See the difference from Day 1

Low-latency

Encounter Length	SOAP Notes Generation Time
7.5 Mins	30 Seconds
10 Mins	45 Seconds
15 Mins	70 Seconds
30 Mins	120 Seconds
45 Mins	240 Seconds

Average encounter length is 7.5 mins

Time Saving

Time Saved per Patient Encounter (avg)

6 minutes

Time Saved per Day

90+ minutes

Faster Reports

18X

Patients/day

3-8 extra

Note Section Accuracy

Chief Complaint	98.54%
Illness History	96.71%
Observable symptoms	100%
Clinical findings	94.84%
Treatment options	89.99%
Interventions	100%
Patient Instructions	92.48%

Designed targets from internal materials; actual results vary by site. Not evidence of clinical accuracy.

savelife.ai

AizaMD™: Return on Investment

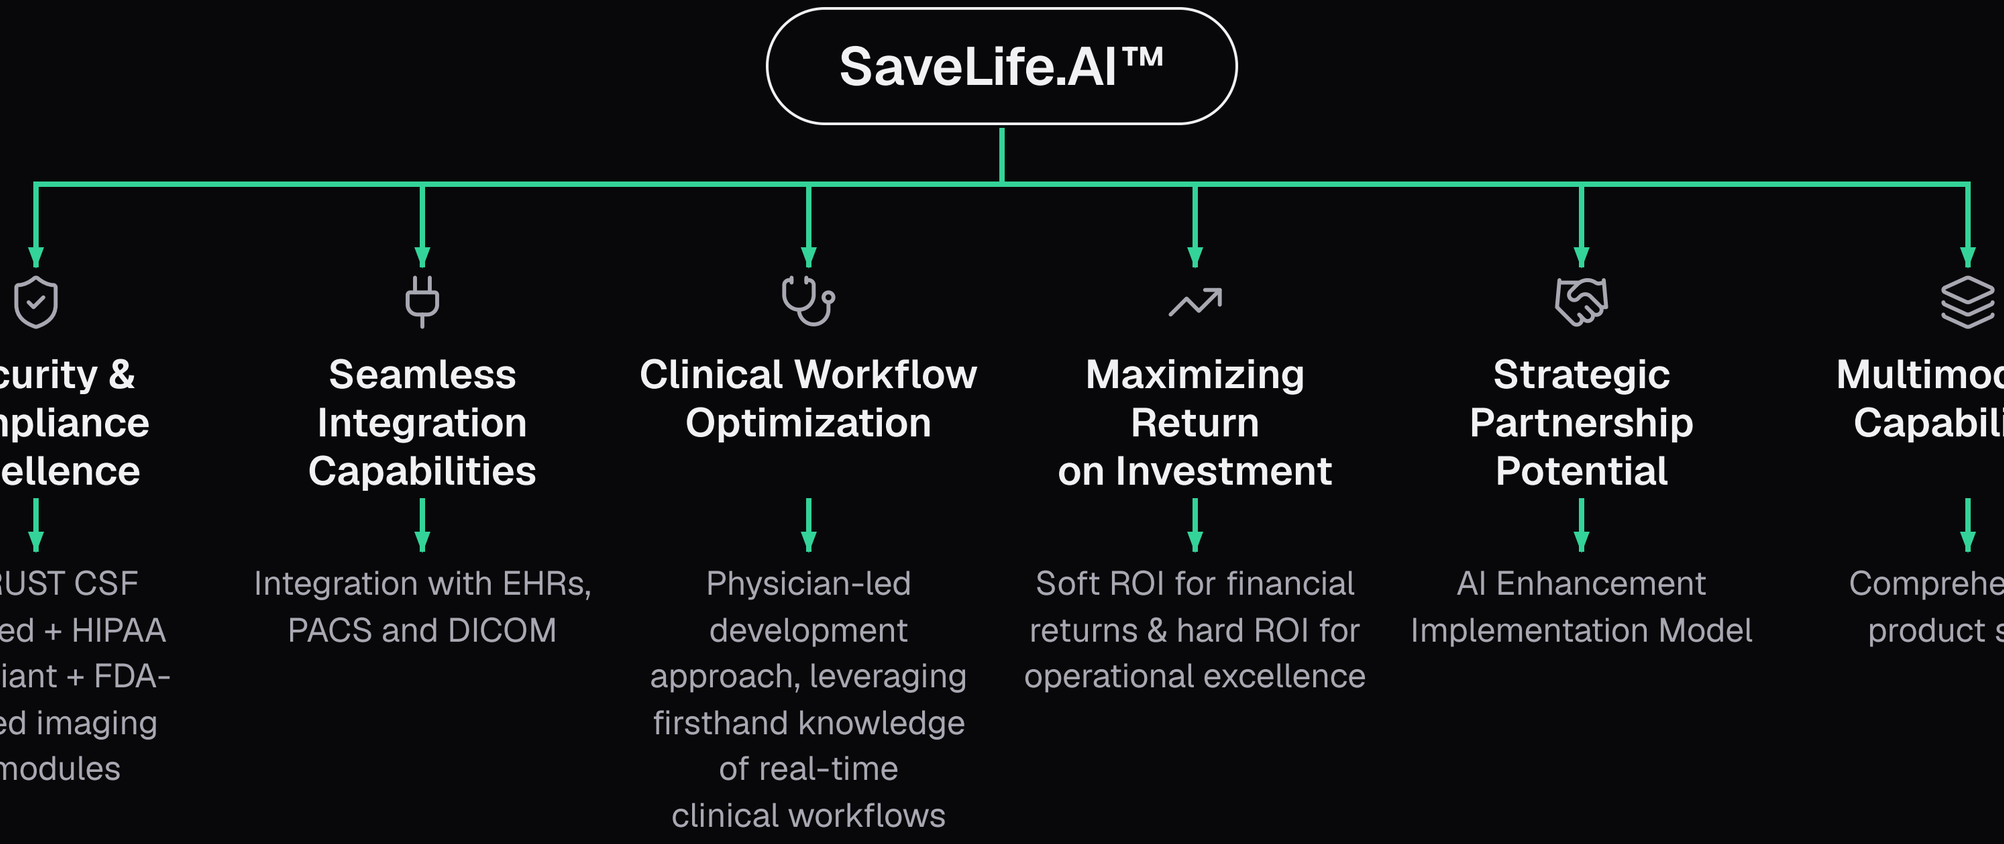

Annual Impact per Clinician

Metric	What This Metric Represents	Value
Hard ROI		
Extra patient revenue	Revenue from 3-8 additional patients daily	$150,000
ICD-10 optimization	Higher reimbursement and improved risk scores.	+$40,000
Cost savings	Reduced scribe costs, billing errors, and administrative overhead.	+$20,000
Total Financial	**Combined annual return from revenue increase and cost reduction. 25-46x ROI.**	**$210,000**
Soft ROI		
Burnout reduction	Designed to reduce after-hours charting	-60%
Satisfaction increase	Clinicians focus on patient care rather than writing/typing	+80%
Care time increase	1.5-3 hours daily for longer visits or work-life balance.	+20%
Patient interaction	Eye contact and natural conversation without screen distraction	+44%

Illustrative estimates from internal materials, not guaranteed returns; actual results vary by site.

savelife.ai

SaveLife.AI Framework

FDA-cleared: the imaging modules NeuroICH K241719, MammoSightAI K252954, CXRDetectAI K253751, not AizaMD.

AizaMD

savelife.ai

AI Governance

Shipping a model is the start of the obligation, not the end.

Model Cards

Each model carries a documented baseline.

Drift Monitoring

Live performance will be measured against that baseline.

Human in the Loop

Every note is reviewed and signed by the clinician.

Change Control

Model updates follow a declared change-control path.

HITRUST CSF Certified. SaveLife.AI's 510(k) clearances belong to its imaging modules (NeuroICH K241719, MammoSightAI K252954, CXRDetectAI K253751). MonitorAI, which runs these controls, is in development.

AizaMD

savelife.ai

Why Choose SaveLife.AI?

19 Domains, 200+ Controls

HITRUST CSF Certified

99.41% breach-free success rate

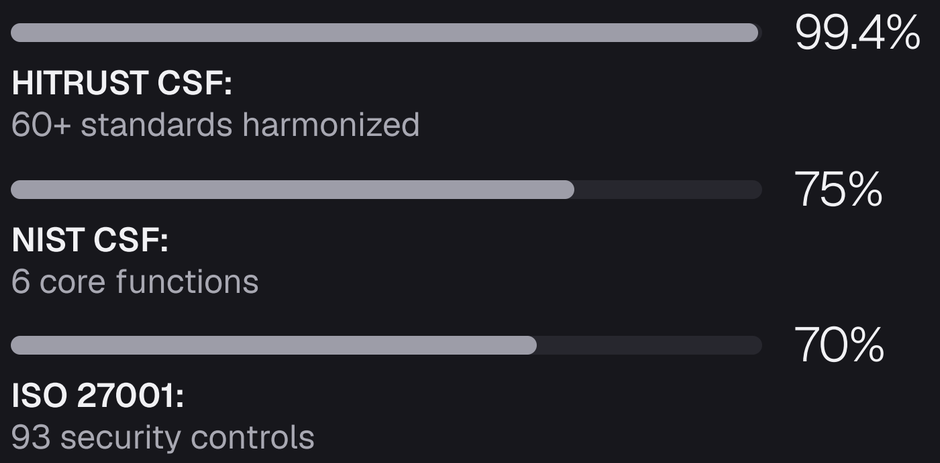

Zero-Trust Architecture

Verifies users and devices with strict data controls

Continuous Risk Monitoring

Instant security scanning and threat alerts

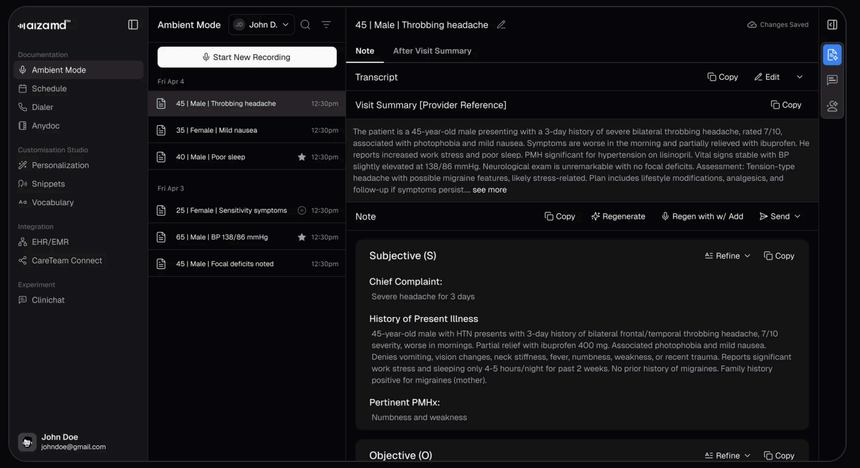

Security Framework Effectiveness Comparison

99.41%: HITRUST's published breach-free rate for certified environments. Framework figures: internal materials.
