savelife.ai

ConnectAI

Seamless Integration

Connect existing PACS systems with our platform through DICOM, FHIR, and HL7 standards for seamless access.

AI-Powered Intelligent Care, Saving Lives!

“If anyone saved a life, it would be as if they saved the life of all mankind”

ConnectAI

savelife.ai

Problem

Fragmented data across EHRs, PACS, and legacy systems

AI tools that work in isolation rather than end-to-end

Patients report errors due to
siloed data and manual re-entry

Delays

~30%

Fragmented Data

~65%

Patient Dissatisfaction

~20%

Solution

Seamless interoperability across systems.

ConnectAI

Bridges EHRs, PACS,
imaging systems,
and AI tools
Eliminates data silos
Works with major
healthcare platforms.

Industry estimates from internal materials. Integration scope is confirmed per deployment.

ConnectAI

Core Features

savelife.ai

ConnectAI: All Products in One Place

Designed to work with a complete product suite without disrupting existing infrastructure.

Lossy compressed and digitized film mammograms: reference purposes only, not primary diagnostic interpretation.

ConnectAI

savelife.ai

ConnectAI: DashBoard

Complete Usage Stats

End to End picture of key stats

Total Encounters

Track the total encounters with AizaMD,
providing a comprehensive view of your activity.

Total Words Dictated with AizaMD

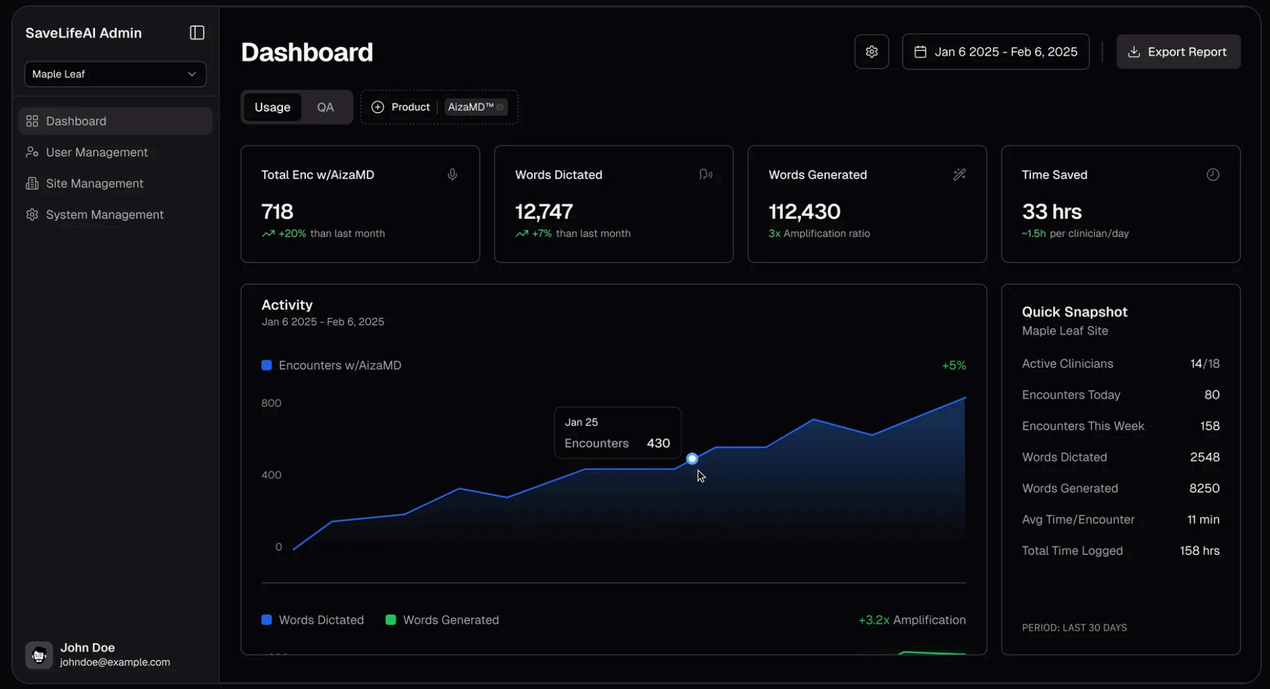

Measure the volume of words
dictated, showcasing your productivity.

Words Generated

Monitor the words generated by the system, highlighting the efficiency of AI-powered documentation.

Time Saved

Evaluate the time saved by using
AI-driven tools, helping streamline workflows.

savelife.ai

ConnectAI: Information System

View & Manage Recent Orders

Access the status of orders with ease, including:

Orders This Month:

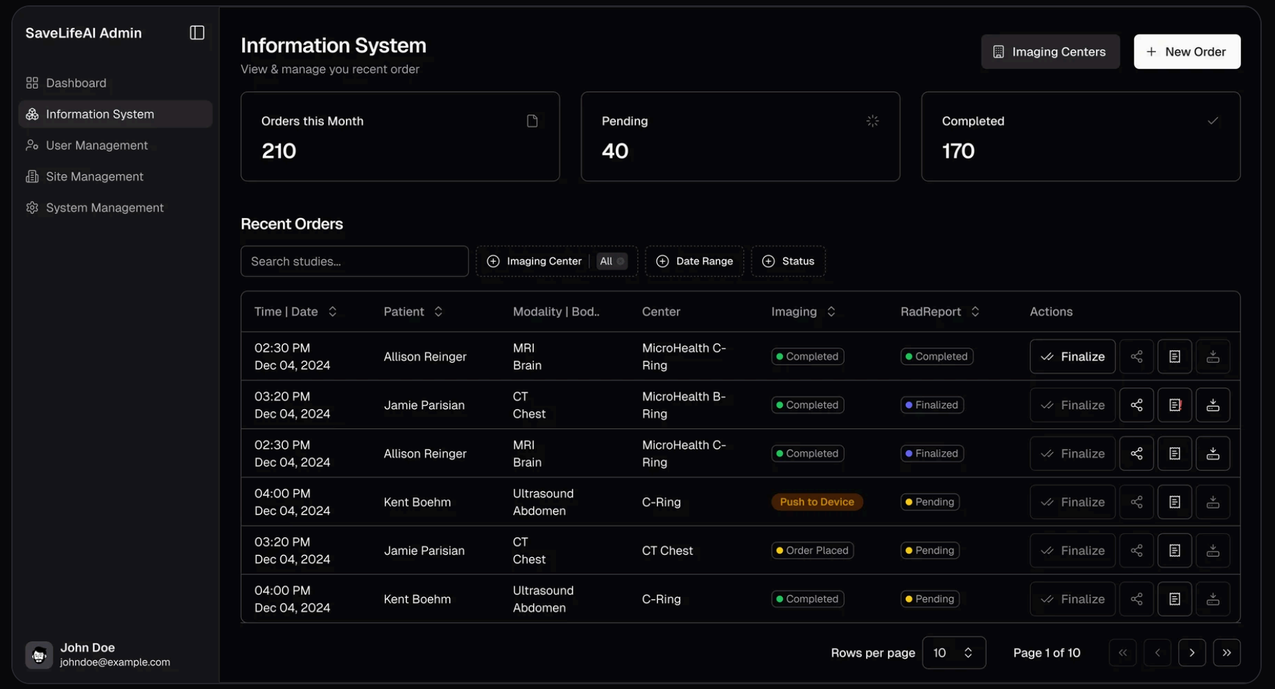

Keep track of your monthly orders.

Pending Orders:

Quickly identify any outstanding orders.

Completed Orders:

Review all completed orders, ensuring timely follow-up.

savelife.ai

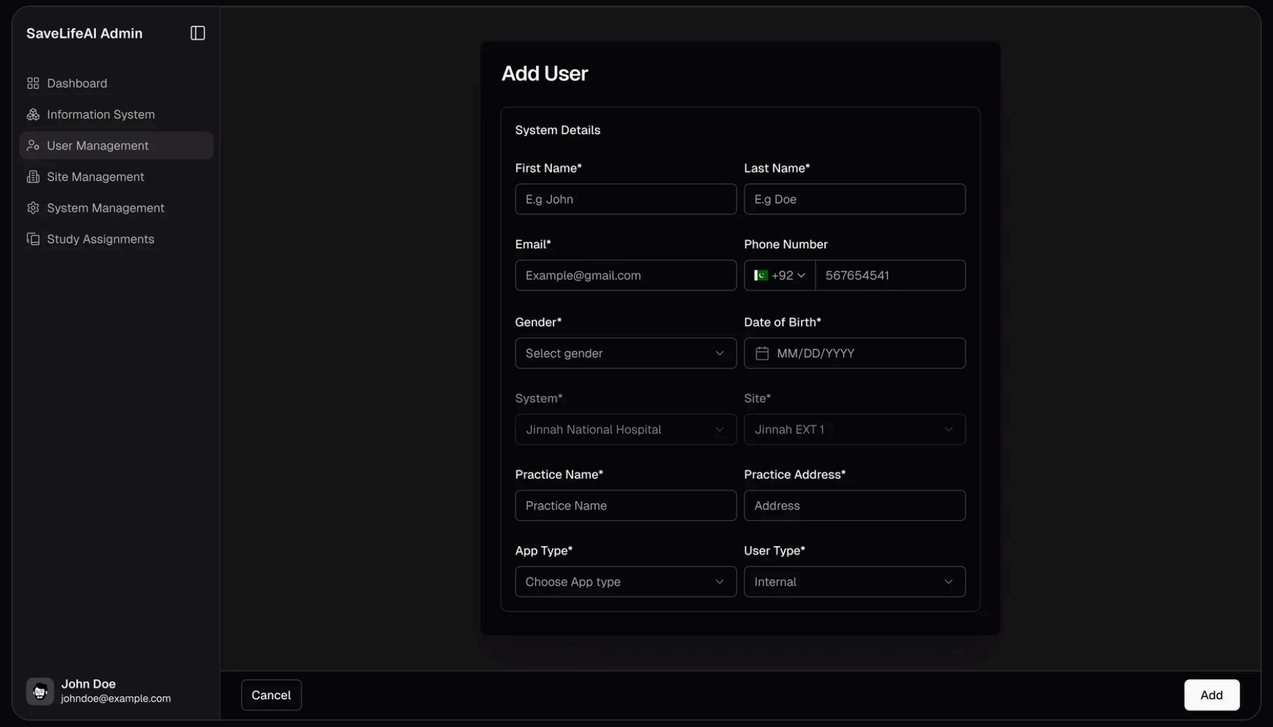

ConnectAI: User Management (Product-wise)

Manage Users for Different Products

Easily manage users based on the products they have access to, including:

Assign Roles for radiologists, technicians, and admins.

Granular Permissions for each product to ensure security and efficient workflow.

savelife.ai

ConnectAI: Site Management (Country-wise)

Manage Sites Across Countries

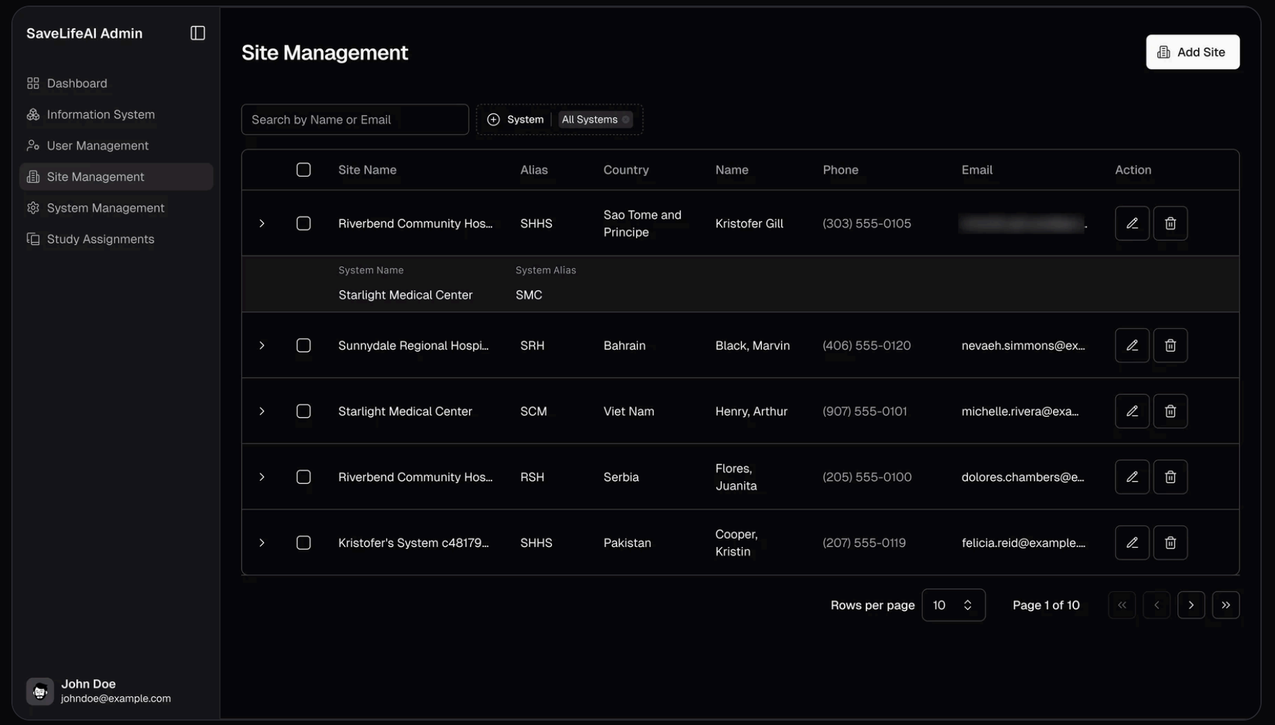

Easily manage users based on the products they have access to, including:

Set Permissions:

Customize permissions for each country or region to ensure secure access.

Multi-Site Admin:

Administer multiple sites from a centralized dashboard, ensuring streamlined operations.

savelife.ai

ConnectAI: System Management

Global Settings & Compliance Rules

Configure Access Policies:

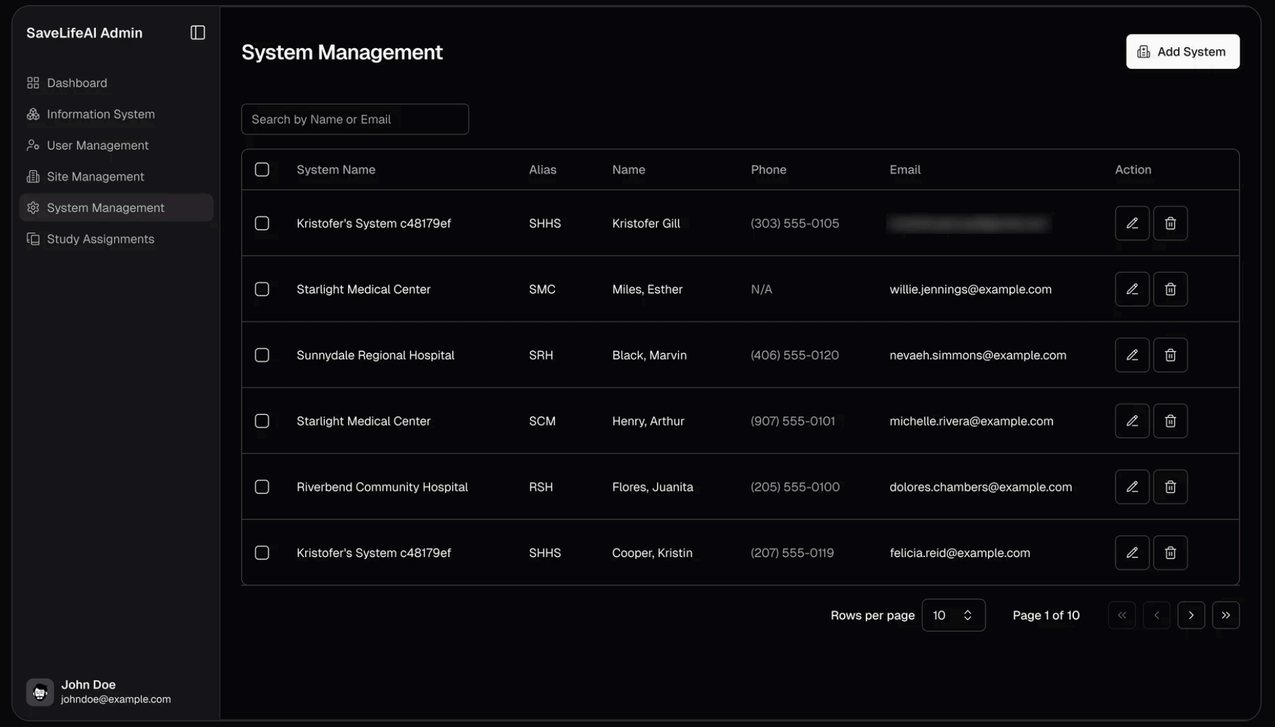

Set up and manage system-wide access policies to ensure regulatory compliance.

Audit Logs:

Track and review user actions for security and compliance.

Monitor Usage & Alerts:

Stay on top of system usage patterns and security alerts to prevent issues before they arise.
